SYNC TECHNOLOGY

The LAVASync 2UE operates a mobile device in a Sync mode. This technology allows the charging of the select USB-C type mobile phones and tablets while interacting with USB accessories.

USB PERIPHERALS INTEGRATION

LAVA adapters allow a mobile device to be integrated into a kiosk installation with multiple USB devices such as magnetic card readers, NFC readers, printers, barcode scanners, keyboard, and other USB-enabled peripherals.

DOCKING DETECT

The Docking Detect feature ensures that when the adapter is plugged into the mobile phone or tablet, the mobile device recognizes that the adapter is present. This feature is a re-imagined form of Plug-n-Play; when the mobile solution, the mobile phone and tablet along with the adapter, is plugged into or out of power, the mobile device will know.
